

Submit online by 6/4/2021

CONGRATULATIONS on choosing Gustavus! It's time to **submit your registration preferences** so that we can get you registered for your first semester of classes at Gustavus. Grab your computer, the Advising & Registration Manual (ARM) and other materials you received in the mail. Use them to review information, complete requirements and placement exams, and learn how to submit your registration preferences. You may also view this document online at gustavus.edu/asc. Click on New Student Registration and Fall 2021.

Follow the checklist below:

1. Complete the Registration Preference form by **June 4**

The **Registration Preference** form is available on your online [Gustavus Enrollment Checklist](#). Complete the form to describe your academic plans, interests, and background, and to tell us your intended major. The information you provide will be used by a Gustavus advisor to create your fall class schedule.

One section of the Registration Preference form prompts you to tell us your preference between the Challenge Curriculum and the Three Crowns Curriculum.

 - **If you prefer the Challenge Curriculum:**
Review the [First-Term Seminar \(FTS\) course descriptions](#) and indicate your top 5 FTS course choices on the Registration Preference form. You will be enrolled in one of those FTS courses for fall semester.
 - **If you prefer the Three Crowns Curriculum:**
Select Three Crowns Curriculum as your top preference on the Registration Preference form. You will be enrolled in CUR100 for fall semester.

For similarities and differences between the two curriculum choices, refer to the enclosed [Advising & Registration Manual](#) (ARM).
2. Take placement exams by **June 4**

Complete a [Calculus Placement Exam](#). Most students need to take a calculus placement exam before registering for classes, especially if you plan to take any level of calculus this fall. See the ARM or the online Enrollment Checklist for details.

Complete a [Chemistry Placement Exam](#). If you plan to take any level of chemistry this fall, you must take a chemistry placement exam before registering for classes. See the ARM or the online Enrollment Checklist for details.

Complete a [Language Placement Exam](#). Most students need to take a language placement exam before registering for classes, especially if you plan to take a language course this fall. See the ARM or the online Enrollment Checklist for details.
3. Submit all official college transcripts and official AP/IB test scores directly to Gustavus* **ASAP**

If you have earned any AP, IB, CIS, PSEO, or other college credits, you must request that the official scores and/or official transcripts be sent to the Gustavus Admission Office* from the institution that granted the credit.

It is not enough that these classes are listed on your high school transcript. To receive credit at Gustavus, you must send official scores and transcripts.

Refer to the ARM under the AP, IB, CIS, PSEO & Other Credits section for details. Remember to have your final high school transcript sent to Gustavus, too.
