BlackBerry® 8830 World Edition Phone
Using Voicemail

New Voicemail Message Alerts
☐ When you receive a new voice message, your BlackBerry 8830 alerts you and prompts you to call your voicemail.

Using Your BlackBerry 8830 to Access Your voicemail Messages
☐ Press and hold the #1 key. (Your BlackBerry 8830 will dial your voicemail box.)

Using Another Phone to Access Your voicemail Messages
☐ Dial your wireless phone number.
☐ Press the asterisk key (*).
☐ Enter your voicemail pass code and press the pound key (#) to access your voicemail.

Voicemail Options
☐ When you are connected to your voicemail box, follow the spoken instructions to set your voicemail options, including enabling or disabling Expert Mode, setting up group distribution lists, selecting reply options, and recording an extended absence greeting.

NOTE: You can now listen to Unified Messaging voicemails in .wav file format through an Email attachment

Ancillary Items (International calling, Phone as modem)

BlackBerry® 8830 World Edition Phone
International Wireless Calling

- Voice Roaming Services
  - 170+ countries

- Data Roaming Services
  - CDMA data services
    - Available in: Canada and Mexico
    - Services: Email, WAP services, BlackBerry services
  - GPRS data roaming (Europe, Asia, Africa, Australia)
    - Available in: 75 countries currently
    - 80+ total countries planned by year end 2007
    - Services: BlackBerry Email services, Web, MMS

- Sprint World Wide Customer Services
  - A dedicated customer service group is available to activate international roaming service and answer questions related to international roaming service.

- Contact Information
  - 888-226-7212, option 2 (or 1-817-698-4199) 24hrs

Note: Activation Rates may apply
Once the BlackBerry has been activated for domestic service, then the international services must also be activated.

- The SIM is already inserted in the device
  - Call 1-888-226-7212, option 2, to activate the account for international voice and data service. The Customer Service rep will need the PCS number and the SIM ID that is included with the phone.
  - The SIM assigned to the BB8830 device should remain in the device for service, even if moved to another PCS number the SIM should remain with the device.
  - Although, pre-paid SIMs or SIMs from other providers will work since it is unlocked; the SIM included from Sprint in the device should remain with that specific device.
Unlocked SIM Card

What does Unlocked SIM mean?

- Ability to swap to another carrier SIM card while traveling abroad
- Can be pre or post-paid card
- Allows user to have a local carrier and phone number for voice service
- Data/Email services not supported on unlocked SIM
- Would have to re-insert Sprint SIM to populate with Email
- Limited text messaging in GPRS/GSM areas
- Sprint SIM card is included in the device

Wireless International Calling continued

Sprint Worldwide Services
Prior To Travel:

- Access data on the Sprint network to ensure working. Data services will only work while roaming if they have been accessed on the Sprint network first.

- To Verify coverage. Users should check www.sprint.com/international to verify the locations they will be visiting offer coverage and to identify which features will be available (voice only or voice and data).

- Understand international dialing. While traveling to international destinations dialing patterns will differ slightly. The BlackBerry 8830 offers simplified dialing with the plus key dialing, but customers should also familiarize themselves with the access codes and country codes for their destinations and where they will need to call.

- Set voicemail pass code. The voicemail must be set up on the Sprint network and the user will need to know their pass code as it will be required to retrieve messages while traveling.

Note: Activation Rates and Roaming Charges may apply
While Traveling

Making International calls including back to the United States, are simplified with the Plus key dialing feature. The plus key dialing feature is only available during GSM mode; if dialing in CDMA mode the access code for the country must be used.

- Press and hold the (+) key until it appears on the phone display.
- Dial the country code and phone number you would like to call.
- Calling the United States in GSM mode; dial (+) 1 (country code for the US) area code then the phone number. Example: calling Sprint World Wide Customer Service from any GSM coverage area dial (+) 1-817-698-4199
- Calling the US from another country in CDMA mode; dial access code 1 (access code for the US) area code and phone number. Example: Calling Sprint Customer from Mexico dial 001-817-698-4199.

Note: Although text messaging is not available while traveling in GSM service areas, each time you arrive in a new country Sprint will send you a welcome text message. It will provide information on how to dial in that country as well as how to reach Customer Service. This is a free message from Sprint.
Checking Voicemail

- To check voicemail you need to dial your wireless number.
- Dial (+) or access code 1, then your ten digit Sprint phone number.
- When you hear the voicemail greeting press the * key.
- Enter your voicemail pass code (#).

Setting Your Global Roaming Options

- Click Manage Connections> Mobile Network options
- Select Network Mode and click in the trackball.
- Select one of the following options and click the trackball. After choosing one click Save.
  - GSM to allow connections to GSM networks only.
  - 1XEV to allow connections to CDMA to CDMA networks only.
  - Global to allow connections to available CDMA or GSM networks automatically.

Wireless International Calling continued

Manually Select a Network

- While traveling you may need to switch networks or technologies to be able to access the data features. A list of carriers that provide data service can be found at http://www.sprintpcs.com/common/popups/pop-gprsCarriers.html.

To Manually Select a Carrier in GSM Mode

- Click Manage Connections> Mobile Network options.
- Select Network Mode and click the trackball.
- Select GSM to allow connections to GSM networks only.
- Select Network Selection Mode and change to Manual. A list of available carriers will be presented.
- Select the carrier that offers data service according to the link above.

Wireless International continued

**Trouble Shooting Tips**

**If voice is not working:**
- Check to be sure the SIM is in the phone
- Power the device off and back on to try to register again with the network
- May need to manually select a different carrier.
- Call international customer care to ensure that international service has been activated (+1-817-698-4199, option 2)

**If data is not working when in a GSM country check the following:**
- Was Sprint Worldwide activated for both international voice and data?
- Is the phone accessing a carrier that provides data service? May need to manually select a different carrier or switch from CDMA to GSM.

*Note: If the issue is not resolved with basic troubleshooting then a trouble ticket will need to be opened. Sprint Worldwide customer care is available 24x7, +1 817 698 4199, option 2.*

Phone as Modem (PAM)

Using Your BlackBerry as a Modem

- The data capabilities of your BlackBerry allow you to use your data connection as a modem for your desktop or laptop PC. You’ll be able to send and receive Email, browse the Internet, and access your company’s network anywhere on the Sprint Network.

Install the BlackBerry Desktop Manager version 4.2 or newer from the CD included with your BlackBerry or download the latest version from www.BlackBerry.com

- Download / Install the Sprint PCS Connection Manager for Phone as a Modem/USB Cable from www.sprint.com/downloads.
- Connect your Power Vision Enabled BlackBerry to your PC via the USB cable.
- Launch the Sprint Connection Manager (Mobile Broadband) on your Desk Top and click the GO button to connect. ‘Modem Mode Enabled”
- Once the connection is established, launch an Internet session, check your Email, or do anything else you would do using a traditional data connection.
- When you’re ready to terminate the data connection, double-click on the Connection Manager icon in the system tray, then click Stop to end the session.
- Disconnect the USB cable from your BlackBerry and from your PC.
