

“Love it!

I would encourage others to try it. It is so convenient and the people I have worked with are professional and delightful.

I have had both in-person and virtual appointments and have been extremely impressed!”

“I just wanted to say that my experience with Nice Healthcare has been very good so far.

It is a very good service.

I particularly appreciate their responsiveness and **the fact that they can come to your house for a visit on the same day. That is the best feature of this service.**”

“It is fabulous. I have absolutely loved every aspect of NICE and it is so easy and convenient. Having the ability to have FREE appointments in basically 30 minutes in a video format is amazing.

The website is so easy to navigate. I was skeptical at first but there are many appointments that this works really well for and all the providers I have encountered have been wonderful.”

“I have used the service quite a bit for myself and my family and **it has been fabulous.**

The providers are fantastic and really caring and do great work.

I love the virtual visits, and the in-home services are amazing too.

I highly recommend this service to anyone!”

“It's awesome. I've used it a few times just for routine stuff and it's super fast and convenient and the PAs and NPs I've interacted with have all been super personable, way more so than what I've experienced in a hospital setting in the last few years.

I had a physical done at home with some extra bloodwork and it was so simple. This gave me a great opportunity to chat with the NP doing everything and I was amazed at their business model and level of services they offer at home. Even X-rays and EKGs are home services.

I hope we continue to use them in the future.”

“I contacted Nice Healthcare and had a same-day video appointment with a nurse practitioner concerning some ankle swelling and pain I had been experiencing. **The provider was great!** She scheduled an in-home x-ray to ensure I hadn't broken or fractured a bone. The x-ray happened within three hours of my initial video appointment. I had the results of the x-ray another three hours later, had a second conversation with the nurse practitioner, was given a treatment plan, and a prescription called in for pain meds. Incredible service, and **I saved \$100s in out-of-pocket cost.** I will definitely continue to use Nice Healthcare.”

“I have had the opportunity to use Nice a few times this year, and **WOW what a difference in the way healthcare is delivered.** I am beyond impressed with the way they are able to not only see me in a super fast time frame, but also the level of care and compassion each person had for my concerns. We have addressed three different issues with varying levels of treatment, including in-home x-rays of my foot. **Every issue was treated with 5-star service in my opinion.**

This is stellar, simply stellar. Hands down the best value for the premium paid. Thanks to you and everyone involved in getting us set up with the program. ”
