

The Nice Pharmacy Program

Nice clinicians can prescribe patients over 550 medications with no out-of-pocket costs.

Types of Medications

Allergy/Sinus	Gastrointestinal
Antibiotics	High Cholesterol
Anti-Fungal	Hypertension
Anti-Viral	Mental Health
Asthma	Skin
Cold/Cough	Thyroid
Diabetes	Women's Health
Ear/Eye Drops	

How it works

- 1 Patients schedule a chat or video visit in the Nice app. Their clinician will determine if they need a prescription and send the order to their preferred pharmacy.
- 2 Nice Healthcare offers 550+ FREE medications. While we cover 550+ common medications, providers will write prescriptions for non-covered medications as well. Patients will have to use their health insurance, or pay in cash, for these non-covered medications.
- 3 Patients pick up their prescription at one of Nice's 60,000 in-network pharmacies, **excluding Walgreens**. Their prescription will be waiting when they arrive. Patients must show their Nice Rx card, printed or in the app, and check out.

Download the Nice Healthcare app for iOS and Android to get started.
