

Grant Writing with Bob and Julie
A KCEL Summer Grant Writing Workshop

Application available at <http://goo.gl/UvUPrN>
(also linked from the Kendall Center home page)

Applications due May 9

Seeking faculty with research, scholarly, and creative project ideas!

- Do you have a great idea for a scholarly or creative project and need funding to make it real?
- Do you plan to apply for a grant soon and need to better define and sell your project?
- Are you a new faculty member writing your first grant proposal?
- Are you a seasoned scholar launching into a new direction with your research?
- Are you seeking funding from an agency or foundation you've never worked with before?

The Kendall Center for Engaged Learning is offering a summer workshop to develop and write a grant proposal. Led by Bob Weisenfeld and Julie Bartley, participants will meet four times during the summer, with the aim of producing a completed proposal. Workshop topics include refining preliminary ideas, identifying funding sources, developing a proposal, and writing a budget.

Workshop Logistics

We are recruiting participants who are in the early stages of developing a grant proposal. Workshop participants must be available for four meetings: June 9; June 11; June 27 **or** 30; and July 30. Workshop participants will receive a \$500 stipend and will be asked to keep the Kendall Center informed of outcome of their grant application.

Bob Weisenfeld is Assistant Vice President of Corporate and Foundation Relations. He serves as a campus resource for faculty project development, budgeting, proposal writing and project administration. He has partnered with faculty and staff across the college on a wide range of projects from public, corporate, foundation and other philanthropic organizations.

Julie Bartley is an associate professor of geology and has written proposals to a variety of funding agencies, including federal (NSF, NASA), private (National Geographic), and philanthropic (Alice Richards Foundation). Funded projects have included work focused on institutional initiatives, STEM education, instrumentation, and research.
